# THINK IN TERMS OF SUSTAINABILITY

We all benefit from vehicles that respect our planet. That's why the Accord offers all the sophistication of a luxury automobile, but still maintains the conscience of a Honda. Thanks to innovations like our new 2.4-liter 4-cylinder Earth Dreams engine with direct injection, the new Accord has an impressive, EPA 36-mpg highway rating.<sup>5</sup> That makes the new Accord one of our most fuel-efficient<sup>5</sup> vehicles ever.

## ECO ASSIST™

With Eco Assist, there are two ways for car and driver to work together to improve fuel efficiency.<sup>5</sup> When you push the ECON button, your Accord automatically adjusts fuel-consuming systems to maximize efficiency.<sup>5</sup> For better performance, push the button again and off you go. The coaching bars on either side of the speedometer will change from white to green depending on how efficiently you're driving. The longer they stay green, the more miles you can get from a tank of gas.

With Eco Assist, there are two ways for car and driver to work together to improve fuel efficiency.<sup>5</sup> When you push the ECON button, your Accord automatically adjusts fuel-consuming systems to maximize efficiency.<sup>5</sup> For better performance, push the button again and off you go. The coaching bars on either side of the speedometer will change from white to green depending on how efficiently you're driving. The longer they stay green, the more miles you can get from a tank of gas.
